

## South-North-Dialogue on ESD and SDGs

### What is common, what is different? ESD approaches towards SDG implementation and transformation in south and north.

#### A learning dialogue.

Friday 20th Nov 2015 at Germanwatch Bonn office

Germanwatch and participants from the Engagement Global NRW/Germanwatch Reverse Programme invite you to a discussion on similar and different approaches towards the implementation of the Sustainability Development Goals (SDGs) by improving the utilization and understanding of Education for Sustainability (ESD). ESD-approaches from different continents will be presented and discussed. We will also create a space for active learning and networking. We hope that a better understanding of different approaches will lead to improved south north understanding, better ESD work in general and that it will pave the way for better project cooperation - opening another door for solidarity and global responsibility.

#### Programme:

09:30 am	Arrival at Germanwatch office Bonn Start the day with a coffee
